Profile

Web developer passionate about open-source software, web standards, and building user-first interfaces that scale. With proven experience using HTML, CSS, JavaScript, TypeScript, and React, I create responsive, accessible websites and applications optimized for performance and a wide range of devices. Based in the EMEA region, I thrive in globally distributed, asynchronous teams. Committed to continuous learning, UX collaboration, and shipping accessible web experiences.

Core Skills

Category	Tools & Technologies
Web Development	HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, React, JSX, DOM API
UI/UX & Design	Responsive Design, Accessibility (WCAG), Cross-Browser Compatibility, Figma
Performance	Code Splitting, Lazy Loading, Memoization, Bundle Optimization, Lighthouse Audits
Testing & QA	Jest, React Testing Library, Storybook
Workflow	Git, GitHub, GitLab, GitHub Actions, CLI, Agile/Scrum
CMS/Content	Headless CMS integration, Markdown, YAML
SEO & Standards	Semantic HTML, Metadata Handling, Structured Content.
Tooling	ESLint, Prettier, Vite, Webpack, SWR, REST APIs
Environments	Linux (Ubuntu), Vercel, AWS (S3, Lambda basics)

Experience

Frontend Developer (Remote Contract)

BrandDrive — Lagos, Nigeria

Oct 2024 – May 2025

- Developed high-performance UIs with React, TypeScript, and SCSS, aligned with responsive, accessible, and semantic standards.
 - Reduced bundle size by 30% via performance tuning and lazy loading.
 - Collaborated with UX and backend teams to ship modular components and production-ready pages.
 - Ensured SEO-friendly practices including page metadata, canonical links, and structured content.
 - Maintained consistent styling across pages using reusable tokens and design systems.
-

Selected Projects

Vanilla-like UI System for Blog & Portfolio

- Built from scratch using Next.js, Tailwind, and Markdown content files.
- Includes RSS, sitemap, SEO-optimized metadata, and mobile-first responsive layout.
- Demonstrates style guide-driven theming and componentization.

Truth or Dare Game SPA

- Designed for mobile users using React + Zustand for clean state management.
- Features accessible modals, keyboard navigation, and dark/light mode toggle.

Open Source Contributions

- Improved accessibility and documentation in React component libraries.
- Published small reusable packages for animation and UI logic.

Education

B.Sc. Business Administration
National Open University of Nigeria
2023 – Present (Expected Sept 2026)

Certifications

- TypeScript Bootcamp – Udemy
 - Complete Full-Stack Web Development Bootcamp – Udemy
-

Personal Development

- Self-learning Linux desktop tooling (Ubuntu/Debian)
 - Exploring Python (Flask) for personal web tool automation
 - Contributor and active learner in open-source communities
 - Currently improving knowledge of accessibility (ARIA, screen reader patterns)
-
